

YOUR YAMAHA SOFTWARE SOLUTION GET THE BEST FOR LESS!

Get the latest **most efficient** Production Preparation Software Package
for an incredibly attractive price!

Return your old P-Tool hardware key and get YSUP-PG

for
10k €
only!

YsUP

YSUP-PG Software merges the best features from the genuine Yamaha P-Tool with the latest Pioneer Option Tools. YSUP-PG handles everything needed for program preparation with Yamaha's 1 Stop Smart Solution.

You're covered all the way from data import, through program preparation, to production scheduling!

Advanced features of YSUP-PG:

- 3D Visual Board Data Editor
- Gerber Image Converter
- CAM Converter (easy import of ODB++, GenCAD and FabMaster files)
- Offline Component Creation
- Auto Teaching
- Auto Polarity Check
- Optimized ASCII Data Convert
- Unified Component Database Management
- Virtual Sticky Tape – production simulation
- Multi-Display Support
- Real-Time Drawing
- Integration with YRi-V and YSi-V offline software
- Support for machines YV100Xg, Topaz XII, Opal XII and newer
- Floating License System – extra flexibility for your NPI team

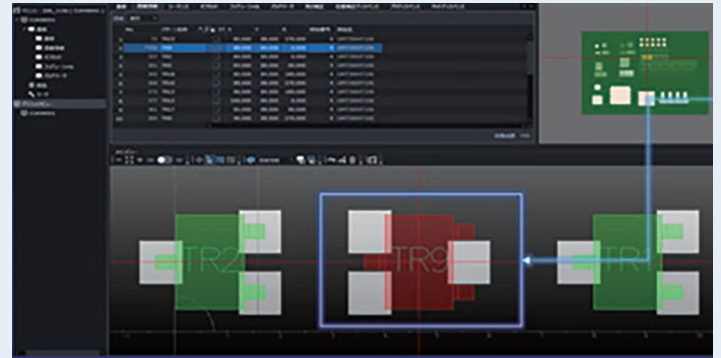

Real-time Drawing

Reflects changes made to a graphic immediately to create error-free component data.

Mounting Simulation

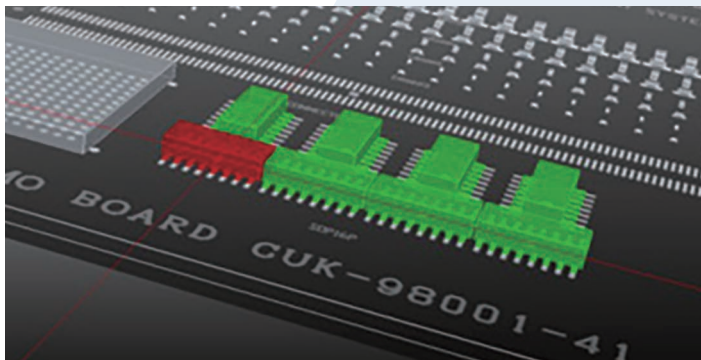

Displays a virtual PCB based on the PCB design data* to check the PCB data for errors before actual mounting.

* PCB design data: Gerber data, ODB++, etc.

3D Graphics

Displays the PCB data in a 3D image to make it easier to see the mounting status of components.
